FBSU DEPARTMENT OF CIVIL ENGINEERING
Course Descriptions

CIVE 210  Statics  3(3, 0, 0)
A course outlining vector mechanics of forces and moments; free-body diagrams; equilibrium of particles and rigid bodies in two and three dimensions; plane and space trusses; frames and machines; axial, shear, and moment diagrams of beams and simple frames; friction; center of gravity and centroid; area moment of inertia; computer applications. Prerequisite: MATH 102.

CIVE 211  Structural Mechanics  3(3, 0, 0)
A course on stresses, strains, and stress-strain relationship; tension and compression; torsion of circular bars; bending and shear stresses in beams; combined stresses; stress transformation and Mohr’s circle. Prerequisite: CIVE 210.

CIVE 220  Engineering Materials  3(3, 0, 0)
This course introduces Civil Engineering materials that include cement, aggregates, admixtures, plain concrete, steel, masonry, plastics and polymers. Concrete mix design, concrete curing and durability; construction equipment and technologies; hot and cold weathering concreting. Prerequisite: Discretion of advisor.

CIVE 220L  Engineering Materials Lab  1(0, 0, 2)
Hands-on laboratory experiments to introduce students to testing different materials including cement, aggregates, admixtures, plain concrete, steel, masonry, and plastics. Co-requisite: CIVE 220.

CIVE 240  Fluid Mechanics  3(3, 0, 0)
An introductory course on fluid behavior emphasizing conservation of mass, momentum, and energy and dimensional analysis; study of fluid motion in terms of the velocity field, fluid acceleration, the pressure field, and the viscous effects; applications of Bernoulli’s equation, Navier-Stokes, and modeling; flow in ducts, potential flows, and boundary layer flows. Prerequisite: MECH 211.

CIVE 240L  Fluid Lab  1(0,0,2)

CIVE 250  Environmental Engineering  3(3, 0, 0)
A course that introduces the fundamentals of environmental engineering. A screening course of major topics in environmental engineering including water and wastewater, environmental hydrology, environmental hydraulics and pneumatics, air, solid waste, noise, environmental modeling, and hazardous waste. Prerequisite: CHEM 101.

CIVE 260  Spatial Measurements  2(1, 0, 2)
A course on the theory of measurements and errors; linear measurements; surveying instruments; leveling; angles, bearings, and azimuths; stadia measurements; traversing–field aspects; traverse computations and adjustment; topographic surveying; triangulation. Prerequisite: Discretion of advisor.

CIVE 310  Structural Analysis I  3(3, 0, 0)
An introductory course covering stability and determinacy of structures; influence lines; deflection of beams and frames by double integration method, moment-area theorems, and conjugate beam; principle of virtual work and applications on beams, frames and trusses; introduction to indeterminate structures; approximate analysis of building frames. Prerequisite: CIVE 211.

CIVE 320  Concrete I  3(3, 0, 0)
A course that covers the mechanical properties of concrete materials; ultimate strength theory of flexure and shear; flexural and shear design of beams; service load behavior; bond properties of reinforcing bars; design of solid and ribbed one-way slabs; design of short , slender and bi-axially columns. Prerequisite: CIVE 211.

CIVE 330  Geotechnical Engineering  3(3, 0, 0)
A course on engineering geology, soil classification and index properties; soil structure and moisture; compaction; seepage; effective stress concept; compressibility and consolidation; stress and settlement analysis; shear strength. Prerequisite: CIVE 211.

CIVE 330L  Geotechnical Engineering Lab  1(0, 0, 2)
Water content determination, liquid and plastic limits, shrinkage limit, grain size distribution (sieve analysis), hydrometer analysis, compaction, in-situ field density, constant and falling head permeability tests, unconfined compression test, tri-axial test, direct shear test . Pre- or co-requisite: CIVE 330.
CIVE 340  **Engineering Hydrology**  3(3, 0, 0)
A course outlining hydrology cycle, hydrologic principles, rainfall-runoff analysis, over land flow, flood routing, frequency analysis, and ground water hydrology; hydrograph analysis. Prerequisite: CIVE 240.

CIVE 351  **Water and Wastewater Treatment and Laboratory**  3(2, 0, 2)
A course that examines the quality and treatment methods of water and wastewater; testing for physical, chemical, and biological parameters. Prerequisite: CIVE 250.

CIVE 360  **Transportation Engineering**  3(2, 0, 2)
A course that introduces the field of transportation engineering through a presentation of the basics of traffic engineering, traffic flow theory, and pavement design. A laboratory component consists of carefully structured experiments that reinforce students’ understanding of the academic concepts and principles. Prerequisite: CIVE 260.

CIVE 400  **Internship for CE Students**  (1cr.)
An eight- to twelve-week professional training course in Civil Engineering. Prerequisite: Senior standing and ENGL 206.

CIVE 401  **Final Year Project I**  (1 cr.)
A chosen design topic of wide range of civil engineering application including structural, geotechnical, transportation, highway, material, hydrologic, water resources and environment and preparation of a detailed execution program for CIVE 402, through Define the project, State the objectives, Complete a literature survey, Set project specifications and master plan, Select a design method or experimental matrix. Prerequisite: Senior standing and ENGL 206.

CIVE 402  **Final Year Project II**  (3 crs.)
A supervised project in groups of normally three students aimed at providing practical design experience in a civil engineering application. Prerequisite: CIVE 401.

CIVE 460  **Highway Engineering**  3(3, 0, 0)
A course that examines road vehicle performance; principles of geometric design and highways; horizontal and vertical alignment; earthwork; intersections and interchanges; parking facilities; basic traffic models; queuing theory and traffic analysis; travel demand forecasting. Prerequisite: CIVE 360.

CIVE 480  **Construction Management**  3(3, 0, 0)
A course on organizing for construction projects; pre-construction activities; bidding and contracts; fundamentals of construction planning, monitoring, and control; application of construction control tools: CPM, materials management, operations analysis, and quality control. Prerequisite: COEN 300.

**Elective Courses**

Elective Courses - *General*

CIVE 403  **Special Topics in Civil Engineering**  3(3, 0, 0)
Any selected topic in the state-of-the-art in Civil Engineering. Prerequisite: discretion of advisor.

CIVE 470  **Introduction to Geographic Information Systems**  3(3, 0, 0)
An introductory course on Geographic Information Systems (GIS) and their applications in the planning and engineering fields, alternatives in computer-based graphics, data concepts and tools, network data management and planning applications, and implementation issues. Prerequisite: CIVE 260

CIVE 481  **Specifications and Cost Estimation**  3(3, 0, 0)
A course on the structure of construction documents and their interrelationships, bidding requirements; general and particular contract conditions; administrative and procedural requirements for construction; technical specifications; construction cost estimations process; unit rates determination. Prerequisite: discretion of adviser.

Elective Courses - *Structural*

CIVE 410  **Structural Analysis II**  3(3, 0, 0)
A course on the solution of statically indeterminate structures by flexibility (force) and stiffness methods for plane and space trusses and frames introduction to the direct stiffness method; influence lines for indeterminate structures; computer applications. Prerequisite: CIVE 310.
CIVE 411  Bridges  3(3, 0, 0)
A course that discusses types of bridges; influence lines; loads and their distribution on bridges; serviceability of bridges; methods of design of bridge deck, superstructure, and substructure. Prerequisites: CIVE 310 and CIVE 320.

CIVE 412  Steel Design  3(3, 0, 0)
A course that examines loads on structures; philosophies of design: LRFD versus ASD; behavior, analysis, and design (according to AISC) of tension members, bolted connections, welded connections, compression members, and beams. Prerequisite: CIVE 310.

CIVE 420  Concrete II  3(3, 0, 0)
A course that builds upon Concrete I and covers continuous beams; wall footings, concentrically and eccentrically loaded single column footings, and combined footings; staircases; bearing walls; cantilever retaining walls; two-way slabs. Prerequisite: CIVE 320.

CIVE 421  Special Topics in Concrete  3(3, 0, 0)
A course that reviews reinforced concrete design; wind load on structures; seismic design of structures; design of shear walls; brackets, corbels, and deep girders; torsion in concrete members; circular, rectangular, and elevated water tanks; spherical, conoidal, and ellipsoidal domes. Prerequisite: CIVE 420.

CIVE 422  Pre-Stressed Concrete  3(3, 0, 0)
A course on materials characteristics; prestress losses; working strength design procedures; composite construction; ultimate flexural strength and behavior; shear design; continuous pre-stressed concrete members. Prerequisite: CIVE 420.

Elective Courses - Geotechnics
CIVE 423  Strength and Rehabilitation of Concrete Structural Systems  3(3, 0, 0)
A course on assessment of structural deficiency using analytical and field test methods; strengthening materials; strengthening of structural members in flexure, shear, and axial load; upgrading of gravity load-designed members for earthquake load resistance. Prerequisite: CIVE 320.

CIVE 430  Foundation Engineering  3(3, 0, 0)
A course that covers site investigations; evaluation of data from field and laboratory tests; estimation of stresses in soil masses; applications of principles of soil mechanics to determination of bearing capacity and settlement of spread footings, mats, single piles, and pile groups. Prerequisite: CIVE 330.

CIVE 431  Applied Foundation Engineering  3(3, 0, 0)
A course on braced excavations, retaining structures, deep foundations, slope stability, and computer applications. Prerequisite: CIVE 330.

CIVE 432  Environmental Geotechnics  3(3, 0, 0)
A course on geotechnical practice in environmental protection and restoration; methods of soil and site characterization for siting of waste repositories and site restoration; influence of physical and chemical processes in soils on the evaluation of contaminant distribution; design of waste containment systems including landfills, slurry walls, and soil stabilization; the applicability and use of geosynthetics; technologies for site restoration and cleanup. Prerequisite: CIVE 330.

CIVE 433  Soil and Site Improvement  3(3, 0, 0)
A course that covers compaction, admixture stabilization, foundation soil treatment, reinforced soil and composite materials, and material sites reclamation. Prerequisite: CIVE 330.

CIVE 434  Geotechnical Earthquake Engineering  3(3, 0, 0)
A course on causative mechanisms of earthquake, earthquake magnitudes, ground motion; influence of soil conditions on site response; seismic site response analysis; evaluation and modeling of dynamic soil properties; analysis of seismic soil-structure interaction; evaluation and mitigation of soil liquefaction and its consequences; seismic code provisions and practice; seismic earth pressures, seismic slope stability and deformation analysis, seismic safety of dams and embankments, seismic performance of pile foundations, and additional current topics. Prerequisite: CIVE 330.

Elective Courses - Transportation
CIVE 461  Pavement Design  3(3, 0, 0)
A course examining highway and airport pavement design; flexible and rigid pavement types and wheel loads; stresses in flexible and rigid pavements; pavement behavior under moving loads; soil stabilization. Prerequisite: CIVE 360.

CIVE 462  Urban Transportation Planning I  3(3, 0, 0)
An introductory course on methods and models used in transportation planning with emphasis on the urban context. Prerequisite: CIVE 360.

CIVE 463  Traffic Engineering  3(3, 0, 0)
A course outlining traffic engineering studies; traffic control of signalized and unsignalized intersections; signal control hardware and maintenance; arterial performance and operations; network optimization. Prerequisite: CIVE 360.

**CIVE 464 Transportation Systems Analysis** 3(3, 0, 0)
A course on transportation and traffic problems in modern society. Among the topics covered are travel forecasting problems and methods; theoretical techniques for traffic flow description and management; highway, railway, and runway capacity and performance characteristics; economic considerations; cost functions. Prerequisite: CIVE 360.

**CIVE 465 Design and Management of Transport Operations** 3(3, 0, 0)
A course that covers the application of quantitative techniques from operations research and probabilistic analysis to transportation problems. Applications covered include: pickup and delivery systems, emergency urban services, facility location, and network problems. Prerequisite: CIVE 360.

**CIVE 466 Transportation Economics** 3(3, 0, 0)
A course that investigates the application of economic principles to the evaluation of projects and policies in the transport sector such as transport project benefits, costs, and financing, and pricing in the transport sector. Prerequisite: CIVE 360 and COEN 300.

**Elective Courses - Water Resources**

**CIVE 440 Hydraulics and Laboratory** 3(2, 0, 2)
Flow in conduits, flow in open channels, flow measurements, and laboratory experiments. Prerequisite: CIVE 240.

**CIVE 441 Hydraulic Structures** 3(3, 0, 0)
A course that covers closed conduit flow, water distribution systems, transient analysis, open channel flow, flood control, culvert hydraulics, design of various hydraulic structures. Prerequisite: CIVE 240.

**CIVE 442 Surface Water Hydrology** 3(3, 0, 0)
A course on design storm, rainfall-runoff modeling, overland flow, flood routing, reservoir routing, simulation models, hydrologic design, urban hydrology, and stochastic hydrology. Prerequisite: CIVE 340.

**CIVE 443 Groundwater Hydrology** 3(3, 0, 0)
A course that deals with properties of groundwater, groundwater movement, general flow equations, steady-state well hydraulics, seepage forces, unsteady well hydraulics, infiltration, and groundwater modeling. Prerequisite: CIVE 340.

**CIVE 444 Hydraulics of Open Channels** 3(3, 0, 0)
A course that examines gradually varied flow theory and analysis, spatially varied flow, and numerical modeling of unsteady flow in open-channels. Prerequisite: CIVE 240.

**CIVE 445 Coastal Engineering** 3(3, 0, 0)
A course on small-amplitude wave theory, finite-amplitude wave theory, conoidal waves, solitary wave theory, wave refraction, diffraction, and reflection, wave forces, and design of maritime structures (e.g., breakwaters). Prerequisite: CIVE 240.

**CIVE 446 Transport Phenomena in Surface and Subsurface Waters** 3(3, 0, 0)
A course on advection, diffusion, and dispersion of pollutants; transport in rivers and estuaries; transport in groundwater; numerical modeling; design of wastewater discharge system. Prerequisite: CIVE 240 and CIVE 250.

**CIVE 447 Water Resources Systems: Planning and Management** 3(3, 0, 0)
A course that introduces the main concepts and principles of water resources planning and management; logical steps in engineering planning and decision making; water resources systems analysis, modeling, simulation, and optimization; economic and financial analysis; flood protection and reservoir operation; and water resources management case studies. Prerequisite: Senior Standing.

**CIVE 448 GIS for Water Resources and Environmental Engineering** 3(3, 0, 0)
A course that introduces the concepts and principles of Geographic Information Systems (GIS) from the perspective of water resources and environmental engineering. It provides coverage of state-of-the-art GIS methods and tools, specifically targeting water resources and environmental applications including: spatial and terrain analysis, geo-statistical analysis, watershed delineation and identification of river networks, representation of groundwater and aquifer systems, time series analysis, and development of GIS integrated water and environmental models. Prerequisite: Senior Standing.
Elective Courses – Environmental

CIVE 450  Methods of Environmental Sampling and Analysis  \(3(3, 0, 0)\)
A course on sampling techniques and instrumental methods in environmental sciences; determination of pollutants in water, air, and soil; analytical techniques; adaptation of procedures to specific matrices; case studies.  Prerequisite: CIVE 250.

CIVE 451  Environmental Chemistry and Microbiology  \(3(3, 0, 0)\)
A course that deals with organic, inorganic, and physical chemistry; chemical equilibrium; reaction kinetics; acidity, alkalinity; composition, morphology, and classification of microorganisms; energy, metabolism, and synthesis; growth, decay, and kinetics; biological water quality indicators.  Prerequisite: CHEM 101.

CIVE 452  Environmental Management and Decision Making  \(3(3, 0, 0)\)
A course that deals with mathematical programming techniques, multi-objective optimization, and the generation of alternatives, as these are used in environmental systems analysis and management; as well as introducing how considerations such as economics, uncertainty, equity, and other sociopolitical parameters may influence environmental management and decision-making.  Prerequisite: Senior Standing and CIVE 250.

CIVE 453  Water and Sewage Works Design  \(3(3, 0, 0)\)
A course that examines the design of water and wastewater schemes, including design reports and a literature search on the development of conventional treatment processes.  Prerequisite: CIVE 351.

CIVE 454  Solid Waste Management I  \(3(3, 0, 0)\)
A course on nature and effects of solid wastes including hazardous wastes; engineering management principles, practices, and techniques for management of solid wastes administration; solid waste generation, storage, collection and transport, processing, resource recovery, and disposal; trip to a local facility.  Prerequisite: Senior Standing.

CIVE 455  Solid Waste Management II  \(3(3, 0, 0)\)
A course on the design of solid waste disposal schemes, including design reports and a literature search on the development of conventional treatment and disposal processes.  Prerequisite: CIVE 454.

CIVE 456  Air Pollution and Control  \(3(3, 0, 0)\)
An introductory course on air pollutants, sources, and effects; emissions estimates, regulations, and monitoring techniques; particulate matter characterization; meteorology and atmospheric dispersion; air pollution control processes.  Prerequisite: CIVE 250.

CIVE 457  Industrial/Hazardous Waste Management  \(3(3, 0, 0)\)
A course that deals with sources, quantity, and quality of industrial wastes; basic industrial waste treatment processes; major industries, types of wastes, and existing treatment practices; disposal and fate of industrial wastes.  Prerequisites: CIVE 250 and CIVE 451, or consent of instructor.

CIVE 458  Environmental Impact Assessment  \(3(3, 0, 0)\)
A course that outlines theories and procedures of assessing environmental impact; analysis of the impact of development on various measures of environmental quality; benefit-cost considerations in environmental impact assessment.  Prerequisite: CIVE 250.
